**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Becoming fair from mid-morning, but conditions deteriorating at height from evening.

Forecast for Monday 07 Sep 2020

Weather: Overcast with occasional rain, with some heavier outbreaks and extensive hill fog. This coupled with strong summit winds will bring a risk of potentially hazardous conditions.

Maximum wind: West to southwest initially mean 30mph with gusts reaching 40-45mph across most exposed ridges and summits, gradually easing from mid-afternoon.

Chance of cloud free mountain/hill tops above 700m: By day virtually nil with bases extensive below 500ft.

Visibility: Generally moderate to poor, but in the hill fog less than a kilometre.

Temperature: **Valleys:** Plus 9 Celsius rising 18 Celsius for a time during the afternoon
At 700m: Plus 8-10 Celsius rising 11-13 Celsius
Freezing level: Above summits
